SHIFT4 P2PE DEVICE: Honeywell Captuvo™ SL42

Shift4 is proud to support P2PE with the Honeywell Captuvo™ SL42. When properly implemented alongside our TrueTokenization® solution, P2PE can greatly reduce your PCI burden and your risk of a data breach. The Captuvo SL42 is an enterprise sled device with protective housing for Apple® iPhone 5 and 5s. It is designed for use at mobile points of sale.

- 3-Track, Bi-Directional MSR
- Provides Additional Power to iPhone
- Protective Housing for Added Durability
- Supports P2PE
- Barcode Scanner
- Supports DES, TDES, and AES Encryption
- Compatible With iPhone 5 and 5s
- DUKPT Key Management

HOW TO ORDER:

1. Choose the Shift4-certified device that best suits the merchant's needs and works with their POS.
2. Select a Shift4-approved distributor on the next page to inject the Shift4 keys, then place the order.
3. Install the configured devices and contact Shift4 to go live with processing P2PE-secured payments.

For detailed device specs and additional information, please visit: www.honeywell.com/captuvo-sl42-enterprise-sled

If you have questions about any part of the process or are unsure who to order devices from, we are here to help guide you. Contact our 24/7/365 Customer Support team at support@shift4.com or 888.276.2108.

Shift4 P2PE Device: **Honeywell Captuvo™ SL42**

NOTE: While in most cases merchants may purchase these devices through their ISV or their merchant bank, the final order will be routed through a distributor listed below. To ensure the devices are properly configured, please provide the correct product numbers for hardware, configuration, and Shift4 P2PE keys when ordering.

*Best Practice: Deploy an equal number of devices with each Shift4 P2PE key available for reduced risk and higher availability.

*Important: There has been some confusion around the Shift4 configuration process regarding the requirement of a PIN encryption key, even if debit is not being utilized. Shift4 recommends that each Shift4 device being shipped automatically include a PIN encryption key along with the Shift4 P2PE key. If this is not included, there is a possibility that the devices will have to be returned for a PIN injection to utilize EMV functionality with Shift4. It is in the merchant's best interest to have an EMV PIN encryption key injected with the Shift4 P2PE key to avoid having to send the devices back and ensure they have the highest available liability protection in the eventual case of Chip+PIN.

If you have questions about any part of the process or are unsure who to order devices from, we are here to help guide you. Contact our 24/7/365 Customer Support team at support@shift4.com or 888.276.2108.
