

SRED

Shift4 Payments P2PE Device: ID TECH SREDKey™

Shift4 Payments is proud to support *True* P2PE® with the ID TECH SREDKey™. Together with our TrueTokenization® and proper implementation, *True* P2PE can greatly reduce your PCI burden and your risk of a data breach. The SREDKey is a secure, PCI-certified keypad with a secure magnetic swipe reader. It is best for use in hospitality and call center environments.

- Magnetic Swipe Reader
- Keypad for Manual Card Entry
- 2-Line, 20-Character, LCD Backlit Display
- USB Connectivity
- Powered Through USB Port
- Reads 3 Tracks of Data
- Supports Shift4's *True* P2PE®
- Supports Shift4's VT4® Web App
- SRED (Secure Reading and Exchange of Data) Compliant

How to Order:

1. Choose a Shift4-certified, PTS-validated POI device with SRED as a function that best suits the merchant's needs and works with their POS.
2. Select a Shift4-approved provider on the next page to inject the Shift4 keys. Place the order.
3. Install the configured devices and contact Shift4 to go live with processing P2PE-secured payments.

*Best Practice: Deploy an equal number of devices with each Shift4 P2PE key available for reduced risk and higher availability.

*Important: There has been some confusion around the Shift4 configuration process regarding the requirement of a PIN encryption key, even if debit is not being utilized. Shift4 recommends that each Shift4 device being shipped automatically include a PIN encryption key along with the Shift4 P2PE key. If this is not included, there is a possibility that the devices will have to be returned for a PIN injection to utilize EMV functionality with Shift4. It is in the merchant's best interest to have an EMV PIN encryption key injected with the Shift4 P2PE key to avoid having to send the devices back and ensure they have the highest available liability protection in the eventual case of Chip+PIN.
