## Shift4 Payments P2PE Device: ID TECH BTMag™

Shift4 Payments is proud to support *True* P2PE® with the ID TECH BTMag™. When properly implemented alongside our TrueTokenization® solution, *True* P2PE can greatly reduce your PCI burden and your risk of a data breach. The BTMag is a secure, compact, mobile magnetic swipe reader that connects to iOS and Android devices via Bluetooth and is designed for use at mobile points of sale.

- Magnetic Swipe Reader
- Bluetooth Connectivity
- Reads 3 Tracks of Data
- Bi-Directional Card Reading Capability
- Convenient Battery Charging Via USB
- Fits in the Palm of Your Hand
- Supports P2PE
- Supports Shift4's VT4® iOS App
- Supports TDES and AES Encryption
- DUKPT Key Management

### How to Order:

1. Choose the Shift4-certified device that best suits the merchant's needs and works with their POS.
2. Select a Shift4-approved distributor on the next page to inject the Shift4 keys, then place the order.
3. Install the configured devices and contact Shift4 to go live with processing P2PE-secured payments.

<b>The Phoenix Group</b> 866.559.7627 tpgpos.com	Not Provided by Vendor		

\*Best Practice: Deploy an equal number of devices with each Shift4 P2PE key available for reduced risk and higher availability.

\*Important: There has been some confusion around the Shift4 configuration process regarding the requirement of a PIN encryption key, even if debit is not being utilized. Shift4 recommends that each Shift4 device being shipped automatically include a PIN encryption key along with the Shift4 P2PE key. If this is not included, there is a possibility that the devices will have to be returned for a PIN injection to utilize EMV functionality with Shift4. It is in the merchant's best interest to have an EMV PIN encryption key injected with the Shift4 P2PE key to avoid having to send the devices back and ensure they have the highest available liability protection in the eventual case of Chip+PIN.
