

EMV PIN PAD

Shift4 Payments P2PE Device: Ingenico iPP320

Shift4 Payments is proud to support True P2PE® with the Ingenico iPP320 terminal. When properly implemented alongside our TrueTokenization® solution, True P2PE can greatly reduce your PCI burden and your risk of a data breach. The iPP320 is an easy-to-install, self-contained, countertop PIN pad payment device that plugs right into your cash register.

- USB, Serial, or Ethernet Connectivity
- EMV Ready
- Keypad
- U.S. PIN Debit
- Magnetic Swipe Reader
- Customizable Monochrome Screen
- Manual Card Entry
- Line Item Display
- Contactless/NFC
- Google Wallet Tap to Pay
- Plug and Play Installation
- SRED Compliant

How to Order:

1. Choose a Shift4-certified, PTS-validated POI device with SRED as a function that best suits the merchant's needs and works with their POS.
2. Select a Shift4-approved provider on the next page to inject the Shift4 keys, then place the order.
3. Install the configured devices and contact Shift4 to go live with processing P2PE-secured payments.

The Phoenix Group	Sales, Hardware Support	866.559.7627		tpgpos.com

Best Practice:

Shift4 recommends deploying an equal number of devices with each Shift4 P2PE key available for reduced risk and higher availability. We also recommend injecting the appropriate PIN encryption key along with the Shift4 P2PE key to prepare for the eventual use of Chip + PIN.

If you have questions about any part of the process or are unsure who to order devices from, we are here to help guide you. Contact our 24/7/365 Customer Support team at support@shift4.com or 702.597.2480 (option 2).
