How to Order:
1. Choose a Shift4-certified, PTS-validated POI device with SRED as a function that best suits the merchant’s needs and works with their POS.
2. Select a Shift4-approved provider on the next page to inject the Shift4 keys, then place the order.
3. Install the configured devices and contact Shift4 to go live with processing P2PE-secured payments.

If you have questions about any part of the process or are unsure who to order devices from, we are here to help guide you. Contact our 24/7/365 Customer Support team at support@shift4.com or 702.597.2480 (option 2).

Best Practice:
Shift4 recommends deploying an equal number of devices with each Shift4 P2PE key available for reduced risk and higher availability. We also recommend injecting the appropriate PIN encryption key along with the Shift4 P2PE key to prepare for the eventual use of Chip + PIN.
