

# We've Redefined What an Integrated Solution Can Be

with technologies and merchant services for the retail industry.

An industry leader in the development of retail software solutions, Multidev delivers leading-edge innovative technology with advanced functionality that ensures the unification of all retail processes and operations.

Shift4 Payments is the leader in secure payment processing solutions, powering the top software providers in numerous verticals. The company securely processes over \$100 billion in payments each year for nearly 200,000 businesses.

Shift4 Payments has partnered with Multidev Technologies to integrate their secure payment technologies to Multidev's ChainDrive retail solution. This integration delivers a flexible, reliable, and feature-rich retail solution to today's most complex omni-channel environments — all while providing future-proof support for tomorrow's payments needs.

# The Next Generation Retail Management Solution Is Already Here

**Multidev Technologies** provides ChainDrive, a complete end-to-end and fully integrated unified commerce platform specifically designed to benefit the multi-channel retailer — and their bottom line.

Budget and sales analytics, store performance indicators, and marketing tools to synchronize your entire operation

Real-time product management, allowing you to simultaneously monitor purchases, receipts, inventory, sales, and transfers across all your locations

Integration with online channels including Amazon, eBay, and more to reach new customers, increase brand exposure, and maximize sales

---

**Shift4 Payments** offers a complete payment solution that includes a secure payment network connection, point-of-sale integration, point-to-point encrypted EMV devices, and full merchant services.

Lowest total cost to accept credit card payments, which could include discounted (or even free) terminals and waived gateway fees

Support for the latest payment technologies, including offline EMV, quick chip EMV, and mobile wallets (Apple Pay, Samsung Pay, Google Pay), plus WeChat Pay and Alipay acceptance to support Chinese consumers

Fast, secure, and reliable payment technologies: EMV, point-to-point encryption (P2PE), and tokenization — including tokenized mobile, call center, and e-commerce payments
