# Part 2b. Description of Role with Payment Cards (ROC Sections 2.1 and 3.1)

Describe how the business stores, processes, and/or transmits account data.	VenueNext develops and manages point of sale and ecommerce solutions on behalf of its customers. Its solutions are deployed at customer locations to facilitate the sale of products and services with VenueNext providing the support and management of the solutions. Its solutions are provided to customers based on a service model, with VenueNext retaining responsibility for the configuration and maintenance of the solutions provided.
	Payment processing of the POS and e-commerce applications is integrated with several payment processors. All solutions are designed so that

	cardholder data is never stored by VenueNext. The POS application integrates with a P2PE solution provider so that all cardholder data is encrypted at the point of entry and the POS application never encounters unencrypted CHD. E-commerce solutions leverage iframes provided by payment processors for collecting and transmitting cardholder data.
Describe how the business is otherwise involved in or has the ability to impact the security of its customers' account data.	As a service provider, VenueNext personnel have the potential to impact the security of applications involved in the processing of cardholder data. Without proper security controls and oversight the security of cardholder data could be compromised
Describe system components that could impact the security of account data.	Application & web servers along with database servers use for storage and key management devices.

#### Part 2c. Description of Payment Card Environment
