Part 2b. Description of Payment Card Business

Describe how and in what capacity your business stores, processes, and/or transmits cardholder data.

VenueNext develops and manages point of sale and ecommerce solutions on behalf of its customers. Its solutions are deployed at customer locations to facilitate the sale of products and services with VenueNext providing the support and management of the solutions. Its solutions are provided to customers based on a service model, with VenueNext retaining responsibility for the configuration and maintenance of the solutions provided.

Payment processing of the POS and e-commerce applications is integrated with several payment processors. All solutions are designed so that cardholder data is never stored by VenueNext. The POS application integrates with a P2PE solution provider so that all cardholder data is encrypted at the point of entry and the POS application never encounters unencrypted CHD. E-commerce solutions leverage iframes provided by payment processors for collecting and transmitting cardholder data.

Describe how and in what capacity your business is otherwise involved in or has the ability to impact the security of cardholder data.

As a service provider, VenueNext personnel have the potential to impact the security of applications involved in the processing of cardholder data. Without proper security controls and oversight the security of cardholder data could be compromised

Section 3: Validation and Attestation Details

Part 3. PCI DSS Validation

This AOC is based on results noted in the ROC dated 06-May-2022.

Based on the results documented in the ROC noted above, the signatories identified in Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document (check one):

	of the PCI DSS ROC are complete, all questions answered affirmatively, DMPLIANT rating; thereby VenueNext LLC has demonstrated full compliance						
Non-Compliant: Not all sections of the PCI DSS ROC are complete, or not all questions are answered affirmatively, resulting in an overall NON-COMPLIANT rating, thereby (Service Provider Company Name) has not demonstrated full compliance with the PCI DSS.							
Target Date for Compliance:							
	ith a status of Non-Compliant may be required to complete the Action Check with the payment brand(s) before completing Part 4.						
Compliant but with Legal exception: One or more requirements are marked "Not in Place" due to a legal restriction that prevents the requirement from being met. This option requires additional review from acquirer or payment brand. If checked, complete the following:							
Affected Requirement	Details of how legal constraint prevents requirement being met						

Part 3a. Acknowledgement of Status Signatory(s) confirms: (Check all that apply) The ROC was completed according to the PCI DSS Requirements and Security Assessment Procedures, Version 3.2.1, and was completed according to the instructions therein. \bowtie All information within the above-referenced ROC and in this attestation fairly represents the results of my assessment in all material respects. I have confirmed with my payment application vendor that my payment system does not store sensitive authentication data after authorization. \boxtimes I have read the PCI DSS and I recognize that I must maintain PCI DSS compliance, as applicable to my environment, at all times. \boxtimes If my environment changes, I recognize I must reassess my environment and implement any additional PCI DSS requirements that apply.

Part 3a. Acknowledgement of Status (continued)

No evidence of full track data¹, CAV2, CVC2, CID, or CVV2 data², or PIN data³ storage after transaction authorization was found on ANY system reviewed during this assessment.

 \boxtimes ASV scans are being completed by the PCI SSC Approved Scanning Vendor AppSec Consulting & Qualys
